Datasheet

VIETTEL THREAT INTELLIGENCE

Shine a light on the hidden danger & sustain a better security surface!

CHALLENGES

- Limited information on cyber threats
- Lack of attack surface visibility
- Insufficient internal security controls

Viettel Threat Intelligence delivers comprehensive cyber threat data from diverse sources, enriching feeds for security solutions via standardized APIs. This empowers organizations with real-time threat updates for strategic defense decisions.

KEY BENEFITS

Minimize Attack Risk

Gain real-time intelligence of the latest threats, automatically updated without human intervention, for a proactive security posture.

Enhance Visibility

Identify internet-exposed assets, pinpoint vulnerabilities from an attacker's perspective, and minimize false positives with External Attack Surface Management (EASM) capabilities.

Optimize Security Costs & Effectiveness

Prioritize threats effectively and optimize security investments with data-driven insights and risk-based recommendations tailored to your business context.

WHY CHOOSE US

01 Experienced Team of Experts

Viettel's team of experts has extensive experience in handling over 500 incidents per year, achieving outstanding international achievements, specially Pwn2Own 2023 (Winner). Threat Intelligence analysts provide accurate and timely alerts and recommendations based on their deep understanding of threats.

02 Diverse & High-Quality Data Sources

Leveraging its advantage as a leading telecommunications provider in Vietnam, VCS-TI collects threat data from multiple sources as data from global internet service providers, from international partners (FIRST, APWG), from cybersecurity services (Pentest, Threat Hunting, MSS), internal research data (APT campaigns, attack groups, zero-day & 1-day vulnerabilities), etc.

03 Expanded with EASM Capabilities

Expands the ability to continuously monitor and detect early cybersecurity risks from an organization's surface assets (unidentified assets, fake accounts). This saves time and resources for the customer's security team, allowing them to focus on high-impact incidents.

Datasheet

VIETTEL THREAT INTELLIGENCE

Shine a light on the hidden danger & sustain a better security surface!

KEY FEATURES

Threat Collection & Category

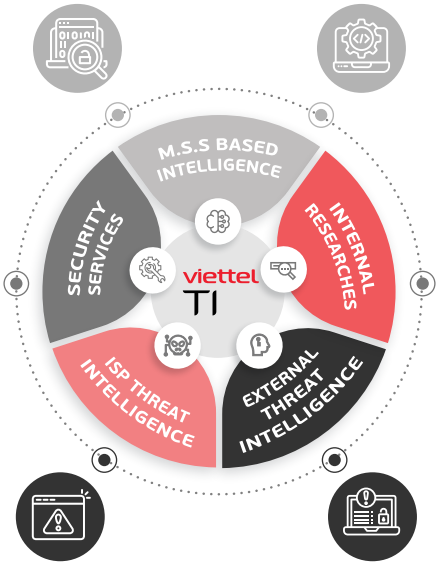
Collect information about cyber security risks from many sources (proprietary, non-public sources); Identifying risks according to different types of alerts helps customers easily manage.

Monitoring & Analytics

Providing tools to support customers in investigating, analyzing, and finding information security risks.

Threat Scoring

Ranking alerts by levels helps customers make decisions about how to respond to risks.



Threat Feeds

Providing MRTI (Machine Readable Threat Intelligence) through Threat Feed (IP, domain, hash, ...) according to STIX/TAXII standards for solutions (SIEM, IPS/IDS, Antivirus, ...).

Global Threat Report

Provides a Global Threat report, offering a comprehensive analysis of global cybersecurity threats.

External Attack Surface Management

Provides early alerts about unmanaged internet-facing assets, potential vulnerabilities, & unusual behaviors on the organization's public-facing assets.

PACKAGES

Feature	Professional	Digital Risk Protection	EASM	Extreme
API automatically updates knowledge for security solutions (Threat Feed)	○			●
New security vulnerability alerts appears (Vulnerability Alert)	○			●
Malware Alert	○			●
Active APT attack campaign alerts (APT Alert)	○			●
Alerts about leaking data and source code (Leaked Data Alert)		○		●
Alerts of disclosure of accounts of internal users & customers using the organization's services (Compromised Credentials Alert)		○		●
Alerts of disclosure of credit card information of users of the organization's services (Compromised Credit Cards Alert)		○		●
Alerts about fraudulent domain names taking advantage of the organization's brand (Phishing/Brand-Abuse Alert)		○		●
Unmanaged Assets Alert			●	●
Alerts for vulnerabilities & security weaknesses on the organization's surface assets (External Surface Vulnerability Alert)			●	●
Alerts for unusual behavior on the organization's surface assets (External Surface Anomaly Alert)			●	●
Information security alert management (Alert Management)	○	○	●	●
Management of information security risk database (Threat Database)	○	○	●	●
In-depth analysis report, identifying information security risk trends at national &industry levels (Tailored Reports)	○	○	●	●
In-depth analysis report, identifying individualized information security risk trends for the organization	○	○	●	●
Premium service Response to cyber security risks (Threat Response)	◔	◔	◔	◔
Customer Support	○	○	●	●

Notes:

- ● *24/7 Alerts via email and online portal.*
- ◔ *8/5 Threat Response Support from 08:00-12:00 & 13:30-17:30 weekdays.*
